PROFESIONAL INFORMATION

Federico Echevarría Sainz founded «Estudio de Urbanismo y Arquitectura» in 1970, as a result of an early vocation supported and spurred by a family history of architects, entrepreneurs and painters, his great-grandfather, Federico Echevarria Rotaache, was a well-known businessman from the Basque Country, his maternal grandfather, José

María Sainz Aguirre, was an Architect and his father, Federico Echevarria Uribe, was a renowned painter who took part in several national and international exhibitions.

Throughout the more than 40 years since its foundation, several renowned professionals from different fields and countries have worked for the Office: Miguel Gómez, Marie Laurence Cerisier, Xu Li... and Tatiana Echevarría who, after finishing her specialization in the US with I.M. Pei, joined the Office to collaborate with her father providing, for each project, a combination of experience and modernity.

Since the foundation, a solid interdisciplinary team of engineers, architects and urban planners has been committed to their clients to provide the maximum COMMITMENT, FLEXIBILITY, ADAPTABILITY, MODERNITY AND TECHNOLOGICAL LEADERSHIP and offer global services of architecture, engineering and landscaping based on an «overall design» of the project, searching for the maximum «design quality», ensuring the best performance in the construction phase and saving time and money.

The office, ftE Federico & Tatiana Echevarría, aware of the need to achieve the highest level of quality in projects, professional and human development of all of its members and environmental protection, is fully committed to continuously improving in all of its activities, making for an exciting business project, in constant evolution adapting to the needs of the clients and the changes in the sector, and intended to be permanent.

Today, ftE is a reference in Spanish architecture and covers all areas of architecture: Office Buildings, Hotels, Residential Buildings, Refurbishment of Buildings with Historical Artistic Value, Prison Buildings, Airports, Shopping Centers, etc. as well as Interior Design and Urban Planning.

At the International level, the office has gained international recognition with projects in more than 20 countries. Currently, there are ongoing projects in Portugal, Budapest, Republic of Panama, Peru, Brazil, Equatorial Guinea...

In 1970 he established the Office in Calle Mayor 77, Madrid

In 1971 he was awarded the March Research Scholarship (6,000€) for the Study of Prefabrication, the team was directed by the Civil Engineer J.A. Fernandez Ordoñez, and he joined as an Architect with the aim of publishing a didactic book on «Construction Industrialization» in 1973.

In 1972, his March scholarship was extended to continue his research on the said topic.

In 1980 his Architectural Office moved to Calle Potosí 9 in Madrid, where it is still found today

In 2010, according to the guidelines followed throughout his career, he established local partnerships in different countries to expand and develop the Office at an international level taking part in different internationalization programs in Spain and outside Spain.
